

Terms List-Ecosystems

**ecosystem
food chain
producers
consumers
herbivores
carnivores
omnivores
detritus
decomposers
habitat
pests
ecology
abiotic
biotic
population
community
ecotones**

**albedo
photosynthesis
trophic level
autotroph
heterotroph
food web
thermodynamics
first law of thermodynamics
second law of thermodynamics
biomass
pesticides
bioamplification
cellular respiration
carbon cycle
combustion
nitrogen fixation**

**denitrification
nutrients
biotic potential
carrying capacity
law of the minimum
law of tolerance
density dependent factors
density independent factors**
