

Properties of Matter

Physical Properties

- a characteristic or description of a substance that may help identify it
- does not relate to how it may become something else

EX: colour, texture, odour, lustre, clarity, taste

State of Matter-solid liquid or gas

Hardness

Malleability

Ductility

Melting and Boiling Point

Crystal Form

Solubility

Viscosity

Density

Read pages 16-19

Questions 1-3 page 19

Chemical Properties

- describes the behaviour of a substance as it becomes a new substance

Combustibility

Reaction with Acid

Reaction with Water

Oct 11 - 7:57 PM
